A fieldtrip to a malrajura

Dr. H. N. Sinha Arts, Commerce and Science College, Patur

Place: Malrajura

Date: 10/9/22

Number of student present within fieldtrip: 65

Chemistry department

Staff member: 9

On Saturday 10/9/22 our science faculty organized a fieldtrip to visit a place which is known malrajura

The tour comprised students of class B.sc 1, B.sc 2, B.sc 3. Accompanied by our science staff. This fieldtrip was a part of our syllabus that day all students came in the college premise at 8.00 am which proper uniform

This malrajura was located about a kilometer away from our college. We left at about 8.30 am and got there in 30. Minute's foot. This malrajura place was very big and beautiful. It had been created naturally it was large open area of various tree there were many beautiful different coloured flowers some of medicinal plant, like adulsa, tulsi, pimpal, vad, alove Vera, many grasses like motichura , dudhi and also botanical garden present there. Which made the environment very pleasurable Many small animals were there. There was a big lake in middle of the malrajura place in there lake various algal material are present where variety of fish and birds were playing

Our staff toured all those places and described students how the malrajura place help to maintain the balance of after that we took group photographs which all students and staff. We came back after spending about 3 hours there this beautiful fieldtrip.

CODERANT METHOD ACTIVITY OR PRACTICAL

To determine the population density of plants by quadrant method. Student select a specific field or particular space at particular time from plant population of the area it changes from time to time and may increase due to may increase or decrease due to many different factors the number of individual of species present per unit area at a given time is called population density. BSc. V students are performed this experiment.
